Prof. Dr. Christoph Görg

UFZ Leipzig, Department Umweltpolitik

Adaptation to Climate Change - how natural and social sciences can work together

At the closure of the summer term, Christoph Görg from the Helmholtz Centre for Environmental Research UFZ will give a presentation on one of the recently most popular topics to be researched and discussed: Adaptation to climate change. Thereby, questions of practical implementation of adaptation to climatic changes as well as theoretical aspects of how ecological and social systems can be related to each other shall be presented.

In adaptation research and policy there are often both natural as well as social scientists involved which can be seen as potential as well as a challenge. As project manager of the BMBF climate change adaptation program "KLIMaanpassung ZUKunfts-fähig Gestalten – KLIMZUG Nordhessen" Christoph Görg will give insights into his experiences on the collaboration of scientists with different background and present adaptation strategies developed for Nordhessen, Germany.

Die Vortragsreihe
ist eine
interdisziplinäre
Plattform zur
Information und
Diskussion für
Studierende,
Forschende und
Lehrende

Gäste
